

SUMMARY

Computer Science student with a growing interest in web development and proven experience in backend and cloud services. Skilled in building and improving system functionality, and supported by volunteering roles that strengthen communication and community engagement.

PROFFESIONAL EXPERIENCE

Amazon (AMM13) | April-October2025

Software Engineering Intern

- Developed backend services using **Kotlin, Java, Spring Boot**, and **TypeScript**. Worked on improving the code structure and adding new backend features while upholding service and code standards.
- Built and integrated RESTful APIs with a clean and maintainable design.
- Worked in AWS cloud environments, managing monitoring tools and setting up infrastructure using AWS CDK.
- Enhanced system efficiency by adjusting configurations and optimizing resource use.
- Created and maintained React UI components to support internal tools and developer workflows.
- Worked with a distributed engineering team, joining design discussions and coordinating feature delivery across different time zones.

EDUCATION

Hashemite University | 2022 - Present

Computer Science Student

Relevant coursework: Data Structures, Algorithms, Databases, Networking, Object-Oriented Programming

Expected Graduation Year: **2026**

VOLUNTEERING EXPERIENCE

TedX Hashemite University | October - April 2025

Event Organizer | October - July

Assisted in organizing event activities and coordinating logistics for a smooth attendee experience

IEEE HU | 2024 - 2025

Public Relations Officer

Managed outreach and communication with participants and organizations to secure involvement in student -support activities and Women in engineering initiatives.

SKILLS

- Languages: Kotlin, Java, TypeScript
- Backend: Flask,NestJS, REST APIs, JUnit, MockK
- Cloud: AWS (CDK, cloud environments, monitoring),
- Web: React, HTML, CSS
- Databases: SQL, MySQL
- Tools: Git, version control

PROJECTS

Bridge – Educational Planning and Analysis System (NestJS, TypeScript)

Built a system that analyzes student assessment data and generates adaptive learning plans, with Excel upload processing, performance analytics, and teacher dashboards.

Expense Tracker Web App

(HTML,CSS, JavaScript,Python(Flask),SQL)
Developed a web app to track and categorize expenses with dynamic updates (JS) and database management.
